Product Features

Size	L120 x W70x H24mm	**Input voltage**	DC7～24V / 1A	**Support chip**			
Number of pixels	8～2048 pixel x 4	**Speed ontrol**	32 adjustable	**One single line**	TM1804 / TM1804B / TM1809 / TM1812 / TM1923 / TM1934 / TM1913 / TM1926 / TM1826 / TM1829 / TM1914 / TM1914A / TM1916 / TM1918 / TM1814-RGBW / UCS1903B / UCS1903N / UCS1909B / UCS1912B / UCS2909B / UCS2912B / UCS2903B / UCS2904B-RGBW / WS2801 / WS2811 / WS2812 / GS8205 / GS8206 / SM16703 / SM16703P / SM16704P / SM16704PB / SM16709P / SM16712P/INK1002 / INK1003 / LX1203 / LX1603 / LPD6803 / LPD8806 / APA-102 / P9813 / P9823 / INK1504		
Effect	255	**Memory**	Automatic memory function				
LED sequence	Arbitrarily set	**Synchronous mode**	485 cascade synchronzation				
Control mode	Android APP	**Music control**	The environment music	**Two single lines**	WS2801/LPD6803 LPD8806/APA-102	**DMX512**	DMX512 Standard protocols and expand

Operation

1, According to the wiring diagram connected lamps and connected to power, controller lights flashing
2, Open the phone or tablet WiFi search VSS-xxxx network hotspot and access. Wi-Fi password:55558888
3, Starting APP into the hardware scan state, the controller will enter the interface
4, Touch set button to enter the password to set the interface, the configuration of the lamp parameters. set password: 55558888
5, Open the color below the switch, slide or other operation interface can be.
