Technical Specs

Input signal:	DMX512/RDM	Audio format:	MP3、WAV
Input voltage:	12-24Vdc	Working temp:	-30°C ~ 55°C
Number of tracks:	128	Dimensions:	125×33×20mm(L×W×H)
TF card / USB:	128G (Max)	Package size:	127×35×24mm(L×W×H)
Output mode:	Bluetooth 4.2, Line Out	Gross weight:	110g

Product Size

Unit: mm

Structure diagram

* Insert USB or TF only; If both, take the last insert as standard.

Connection Diagram

Bluetooth Connection

- Step 1: Insert a TF card or USB with copied tracks into the music controller. (Refer to $P7 \rightarrow FAQs \rightarrow How$ to change track sequences)
- Step 2: Connect MS Panel to the music controller. (Connection & setting method: Refer to P6 → Add a music controller)
- Step 3: Short press the settings button of music controller and the communication light [blue light] will flash fast, then the controller will be in search of the Bluetooth speaker. [Complete step 3 within 2 minutes, otherwise continue repeating step 2]
- Step 4: Refer to the Bluetooth speaker manual. Turn on Bluetooth and put the Bluetooth speaker in paring mode; When the voice prompts "Connect successfully" are delivered and the communication light is on, connect successfully. Then tracks can be played through MS Panel App.

★ Remove paired Bluetooth speaker from the controller (reset to factory defaults): Long press the settings button for 10 seconds until the communication light flashes fast, then remove successfully and reset to factory defaults simultaneously.

- Step 1: Insert a TF card or USB with copied tracks into the music controller. [Refer to $P7 \rightarrow FAQs \rightarrow How$ to change track sequences]
- Step 2: Connect MS Panel to the music controller. (Connection & setting method: Refer to P6 → Add a music controller)
- Step 3: After the music controller being power-on, connect the audio power amplifier through the audio cable then tracks can be played through MS Panel App.

★ If there is no sound on the speaker, please check whether the audio power amplifier is connected to the speaker cable normally. If it is connected normally, long press the settings button of music controller for 5 seconds. When the voice prompts "Bluetooth receiving mode" are delivered, then tracks can be played through MS Panel App.

App Operating Instructions

- 1 Register an account
 - 1.1 Install App via mobile phone.

Scan the code to download "Ms Panel"

1.2 Open the App and register or log in.

2 Add MS Panel

Open the App, click "+" icon in the upper right corner of "My Devices". Afterthe phone connecting to a router, follow tips to enter your password and click "Next step". Press the settings key at the bottom of panel to enter the settings interface, and select "Connect WiFi", click "Next step" and wait for the prompts of completing the connection to the Internet.

3 Add zones

After adding MS Panel, enter the control interface and click "Add Zones". The panel is now searching for devices. After completing the search, choose LED fixture types and devices you want to add and save them.

4 Add a music controller

After adding MS Panel, enter the interface of "Zone Management" and click "Add Zones". The panel is now searching for devices. After completing the search, choose a LED fixture type and a music controller you want to add and save them. After adding, choose the zone you want of the "Zone" interface then it can play tracks, adjust the volume and etc.

5 Scene applications

Save scenes: After adjusting lighting status of the zone you want, click the button in the upper right corner of the "Zone " interface. Follow the tips to choose and save the cone and music controller. Execute scenes: Switch to the "Scene" interface and click the blank to execute the scene.

FAQs

- Can I both connect a wired speaker and a Bluetooth speaker at the same time?
 Not recommended. Because tracks from the Bluetooth speaker may be delayed while playing.
 Yet the delay time of tracks from the wired speaker is relatively short. So it may occur a deviation When both speakers are playing tracks.
- 2. How to change track sequences?

Tracks are in chronological order sorted by copy time. If you want a track to play first, you need to clear the USB or TF card and then copy the track first. The same operation for the rest of tracks.

Attentions

- · Products shall be installed by qualified professionals.
