## LTECIH

## LED Intelligent CT Driver (constant voltage)

Dimming interface: 0-10V(1-10V/10V PWM/RX), Push DIM/CCT

- Dimming interface with photoelectric isolation, in line with the latest safety standards, more safe and reliable.
- 0-10V DIM and color temperature adjusting driver, 2 independently SELV constant voltage output channels.
- Constant power design, adjust different color temperature to keep the same brightness.

Dimming range from 0-100\%, LED start at 0.1\% possible

- With soft-on and fade in function, visual more comfortable.
- Color temperature adjusting range: $2700-6500 \mathrm{~K}$
- Automatic recognition of 0-10V, 1-10V input signal.
- 0~100\% flicker-free, High frequency exemption level.
- High efficient driver: efficiency $93 \%$, PF>0.98, THD $<6 \%$
- In line with the EU energy efficiency ERP directive, standby power consumption < 0.5W
- Innovative thermal management technology, intelligent power life protection
- Over-heat / Over voltage / Over load / Short circuit protection, recover automatically
- Fully-protected plastic housing with design of dismountable end cover.
- Suitable for indoor I/II/II type lamps application.

* The driver is suitable for connecting resistor current-limiting LED fixture (e.g. LED strip). The inrush current will be dozens of times times increased if connecting built-in constant current IC current-limiting LED fixtures, the driver will activate the overloaded protection (hiccups flickering). When you order, please remark controlling the constant current LED fixture (e.g. MR16 lamp, underground light, LED wall washer, constant current LED strip, etc.), then we can prepare the special programs

## 0-10V Connection

1. Brightness adjustment.

2. Color temperature adjustment.

3. Brightness and color temperature adjustment respective.

## Push DIM/CCT Connection

1. Brightness adjustment.

2. Color temperature adjustment.

* Dimming interface priority: First 0-10V, next Push DIM/CCT.

## Push DIM/CCT

DIM

- On/off control: Short press.
- Stepless dimming: Long press.
- With every other long press, the brightness goes to the opposite direction.
- Dimming memory: Brightness will be the same as previously adjusted when turning on again.

CCT

- Color temperature adjustment: Long press
- With every other long press, color temperature go to the opposite direction.
- Color temperature memory: Color temperature will be the same as previously adjusted when turning on again.
* Applicable to brightness adjustment, color temperature adjustment and brightness/CT adjustment respective of Push DIM/CCT connection.

DIM/CCT

- On/off control: Short press.
- Stepless dimming and color adjustment: long press
- With every other long press, color temperature go to the opposite direction.
- Dimming memory: Brightness will be the same as previously adjusted when turning on again.

Reset switch

* Applicable to brightness and CT adjustment simultaneous of Push DIM/CCT connection.

## Application of Protective Cover

Wire pressing board:

Push the wire pressing board to fix the wire.

Push outward the side plate meanwhile use the tool to uninstall the wire pressing board.

Break off the bottom left and right to remove the protective cover.
