

LTECH

DMX512 DECODER

LT-905

5 CHANNELS

- 8 bit / 16 bit
- 2 kinds of DMX interfaces
- Shortcut / Over load protection

LTECH

Product Introduction:

1. Designed with 5 channels output, and Max. 5A current per channel, up to 600W output power.
2. Easy operation with digital display and the touch buttons.
3. Support 2 kinds of DMX ports: 3-pin XLR, RJ45.
4. With RDM remote management protocol, the operations can be completed via the RDM master console, such as parameters browsing & setting, DMX address setting, equipment recognition, etc.
5. With shortcut protection and over load protection, as well as warning function when fault.
6. With fast self-testing function.
7. High/low PWM frequency for optional
8. 16bit (65536 levels) / 8bit (256 levels) grey level optional.

Technical Specs:

Model:	LT-905	Protection:	Shortcut / Over load
Input Signal:	DMX512/RDM	Working Temp.:	-30°C~65°C
DMX Interface:	3-pin XLR, RJ45	Dimensions:	L122×W110×H37mm
Input Voltage:	12-24Vdc	Package Size:	L127×W123×H41mm
Current Load:	5A × 5CH Max. 25A	Weight (G.W.):	550g
Output Power:	(0~60W...120W) × 5CH Max. 600W		
Grey Level:	8bit (256 levels) / 16bit (65536 levels)		

Product Size:

The Unit: mm

2

Main Component Description:

Digital display

- Digital display will enter the locked mode without operating after 15S.
- Long press "M" key to unlock.
- Short press "M" key to switch numbers.
- Press "▲" "▼" key to adjust value.

Dip switch

1 Bit	2 PWM Hz	3 DIM	4 Screen
16	High	Smooth	30S off
8	Low	Std	Enable

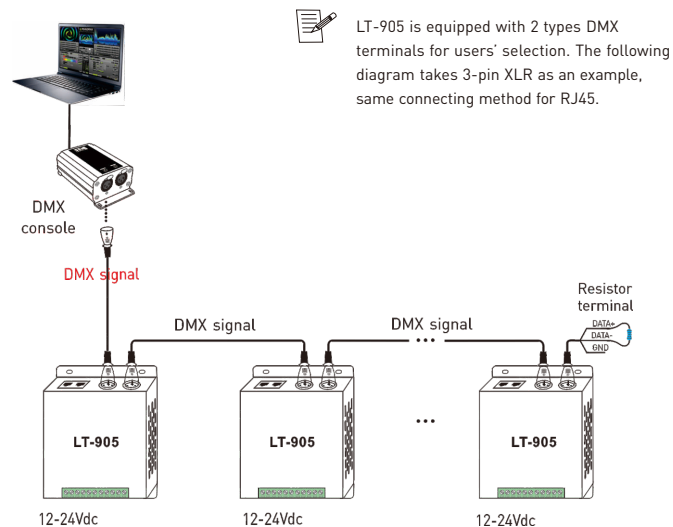

Wiring Diagram:

1 Connecting LED lights:

2. DMX console connection:

LT-905 is equipped with 2 types DMX terminals for users' selection. The following diagram takes 3-pin XLR as an example, same connecting method for RJ45.

- * An amplifier is needed if more than 32 decoders are connected or use overlong signal wire, signal amplification should not be more than 5 times continuously.
- * If the recoil effect occurs because of longer signal line or bad line quality, please try to connect 0.25W 90-120Ω terminal resistor at the end of each line.

3. The connection diagram of 2 kinds of DMX/RDM terminals:

These 2 terminals can be connected in a mixed way.

- * **Installation Attention** : please reserve enough ventilation distance between decoders (>20mm), be sure not to block the vent, or will affect lifetime of decoder for poor heat dissipation.
