## Wiring Diagram

### Note:

1. The two DMX decoder first address need be set as 1 and 4, each decode 3 channel DMX data.
2. The inner PCB have 2bit DIP switch to set 0-255 or 0-100 display, 6 channel or 5+1 channel output.  
The factory setting is 0-255 display and 6 channel output.

0-255 display  
6 channel output

0-255 display  
5+1 channel output

0-100 display  
6 channel output

0-100 display  
5+1 channel output
