System wiring

Tuya APP network connection

Switch off the power of the WiFi dimming driver (the RUN LED indicator must be off), then switch on power again, continuous five times fast operation. The light blinks 5 times, means clear previous network connection, enter Smart config mode, Then the RUN LED indicator fast flash a few times.

If Tuya APP network connection succeed, the RUN LED indicator will stop flash, and in Tuya APP, you can find SKYDANCE-RGBW device (or other DIM, CCT or RGB).

Tuya APP interface

White interface

For DIM type:
Touch brightness slide to adjust brightness.

For RGB type:
Touch brightness slide, get RGB mixed white firstly, then to adjust white brightness.

For RGBW type:
Touch brightness slide, adjust white channel brightness.

Color temperature interface

For CCT type:
Touch color wheel to adjust color temperature.
Touch brightness slide to adjust brightness.

Colour interface

For RGB or RGBW type:
Touch color wheel to adjust static RGB color.

Touch brightness slide to adjust color brightness.

Touch saturation slide to adjust color saturation, namely gradient from the current color to white (RGB mixed).

Scene interface

The 1-4 scene is static color for all light type, the inner color of these scene can be editable.

The 5-8 scene is dynamic mode for RGB or RGBW type, such as green fade in and fade out, RGB jump, 6 color jump, 6 color smooth.

Music, Timer, Schedule

The music play can use smart phone music player or microphone as music signal input.

The Timer key can turn on or turn off light in the next 24 hours.

The Schedule key can add multiple timers to turn on or turn off light according to different time periods.

The WiFi Dimming Driver Match Remote Control(Optional)

Use power restart to match the LED driver and RF remote, The LED driver of different light types matches the RF remote of corresponding light type.

Match:

Switch off the power, then switch on power again, immediately short press on/off key (single zone remote) or zone key (multiple zone remote) 3 times on the remote. The light blinks 3 times means match is successful.

Delete:

Switch off the power, then switch on power again, immediately short press on/off key (single zone remote) or zone key (multiple zone remote) 5 times on the remote. The light blinks 5 times means all matched remotes were deleted.

The WiFi Dimming Driver work as WiFi-RF converter to match other RF dimming driver

End user can choose the suitable match/delete ways. Two options are offered for selection:

Use the RF dimming driver's Match key

Match:

Short press match key of the RF dimming driver, immediately press on/off key on the Tuya APP. The LED indicator fast flash a few times means match is successful.

Delete:

Press and hold match key of the RF dimming driver for 5s, The LED indicator fast flash a few times means all matched remotes were deleted.

Use Power Restart

Match:

Switch off the power of the RF dimming driver then switch on power again, immediately short press on/off key 3 times on the Tuya APP. The light blinks 3 times means match is successful.

Delete:

Switch off the power of the RF dimming driver, then switch on power again, immediately short press on/off key 5 times on the Tuya APP. The light blinks 5 times means all matched RF remotes were deleted.
