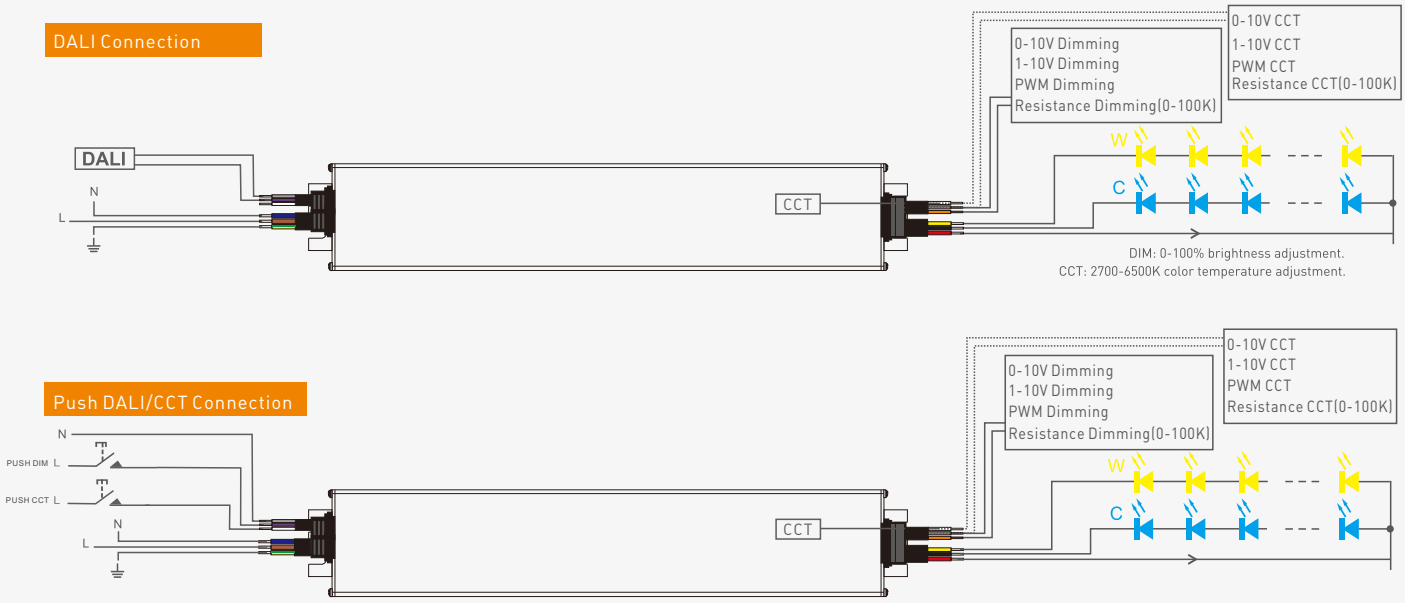
Wiring diagram



* Dimming is non-effective on the condition of Vdc input.
* Dimming interface priority: First 0-10V,next DALI, last Push DIM/CCT

Push DIM

Reset Switch

- On/off control:Short press
- Stepless dimming:Long press
- With every other long press,the brightness level goes to the opposite direction.
- Dimming memory:Go to the brightness level adjusted previously when lights are turned on.

Push CCT

Reset Switch

- Switch color temperature by bin: Short press to preset 4 level color temperature
- Stepless Tinting: Long Press
- Every other long press, the color temperature will be adjusted in the opposite direction
- Color Memory: When PushDIM briefly presses the switch, the light returns to its previously adjusted brightness and color temperature.
