Product installation

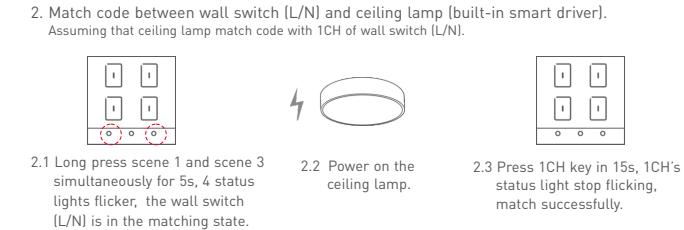

Match code and clear code

Please operate when white status light is on.
Let's take TK-RF04-A as an example, other wall switch operate the same way.

3

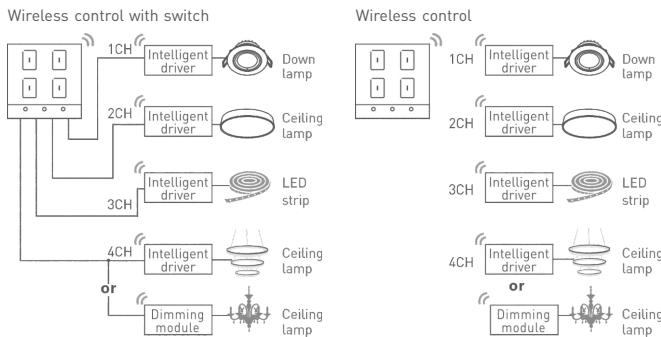

3. Match code between wall switch (L/N) and smart gateway / smart wireless switch / remote.

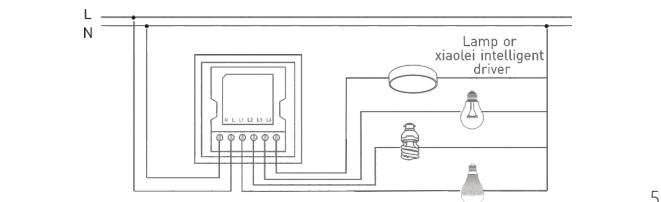

4. Clear Code:
Press scene 1 and scene 3 on wall switch (L/N) simultaneously for about 5s , all white status lights flicker, keep pressing for 5s, all blue status lights flicker, deactivate the matching successfully.

4

Wiring diagram

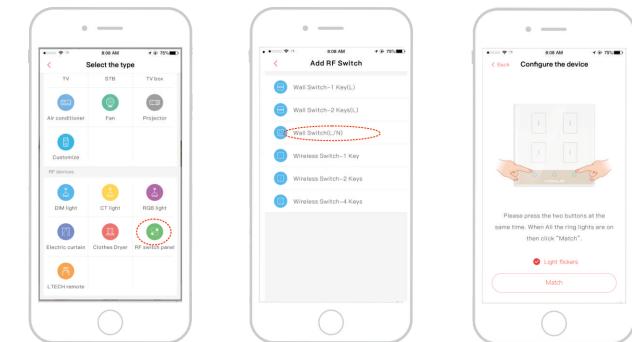

When wall switch (L/N) match up with driver via APP, the lamp's brightness will be the same as previously adjusted when turning off and on again.

5

Adding devices

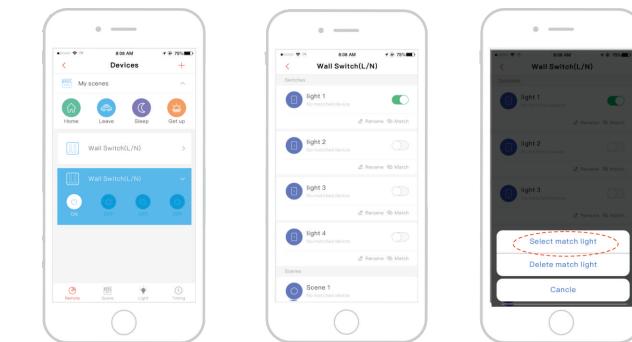

- 1 Before adding wall switch (L/N), please make sure App have been installed and gateway have been set-up, more details can be found on smart gateway manual.
- 2 Open App firstly, click and enter "smart gateway" interface, press "+" icon, and enter "Select the type" interface, click "RF switch panel" to enter "Add RF switch" interface, click wall switch (L/N) and match following the tips.

6

- 3 Finding wall switch (L/N) icon in "Devices" interface, click to enter and begin to control traditional lamps.

* If advanced operation is needed, such as match smart lamps, then you can realize it according to APP prompt.

Click "select match light"

7

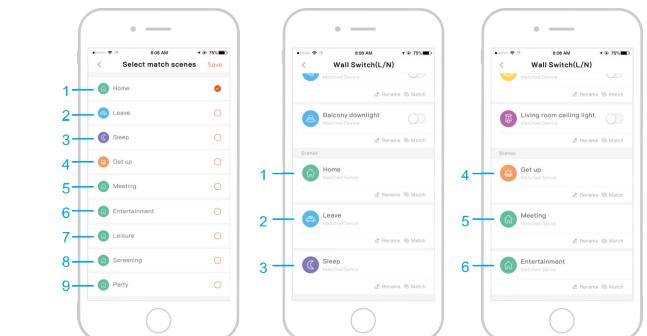

Matching scenes

The scene key of wall switch (L/N) can match with any scene on APP, multiple wall switch (L/N) scenes can be the same or different.

Scene definition, such as:
Home: turn on lights, turn on air conditioner, turn on TV...

Leave home: turn off lights, turn off air conditioner, turn off TV, turn on security...

Sleep: night light, turn on air conditioner, turn off TV, turn on security...

APP can customize 12 scenes, one wall switch (L/N) can match 3 scenes of APP, so that to realize the function of wall switch (L/N) control scenes.
